Geoderma 65 (1995) 343–344

GEODERMA

Contents Volume 65 (1995)

Publisher's Note v

Airborne dust and its significance to soils
R.W. Simonson 1
Identification of multiple loess units within modern soils of Clay County, Nebraska
M.S. Kuzila 45
Soil chronosequence and geomorphology in a semi-arid valley in the Andes of southern Peru
N.S. Eash and J.A. Sandor 59
Estimating the unsaturated hydraulic conductivity from theoretical models using simple soil properties
H. Vereecken 81
Tensile strength of dry, remoulded soils as affected by properties of the clay fraction
A.R. Barzegar, J.M. Oades, P. Rengasamy and R.S. Murray 93
Potassium supplying capacity of soils formed on different geological deposits in the Niger Delta region of Nigeria
P. Loganathan, A.A. Dickson and N.O. Isirimah 109
Decade-scale changes of soil carbon, nitrogen and exchangeable cations under chaparral and pine
A.L. Ulery, R.C. Graham, O.A. Chadwick and H.B. Wood 121
The role of earthworms in the formation of sandy surface soils in a tropical forest in Ivory Coast
C.A.M. Nooren, N. Van Breemen, J.J. Stoorvogel and A.G. Jongmans 135
Formation of short-range ordered aluminosilicates in the presence of a bacterial surface (*Bacillus subtilis*) and organic ligands
M.M. Urrutia and T.J. Beveridge 149

Book Reviews 167

Erratum to "Soil water capacity prediction" [Geoderma 49 (1991) 77–81]
C.R. Berdanier, S.J. Ross and R.B. Grossman 171

Editorial i

Structural variations of humic acids in two sola of Alberta Mollisols
Z. Chen and S. Pawluk 173
Characterization of two humic acid fractions from a calcareous vermiculitic soil: implications for the humification process
D.C. Olk, K.G. Cassman and T.W.M. Fan 195
An instrument for the in situ characterisation of soil structural stability based on the relative intrinsic permeabilities to air and water
B.M. Whelan, A.J. Koppi, A.B. McBratney and W.J. Dougherty 209
The occurrence and interpretation of carbonate and sulfate minerals in a sequence of Vertisols in New Caledonia
P. Podwojewski 223

Phosphate sorption by calcite, and iron-rich calcareous soils
M.K. Wang and Y.M. Tzou 249
Spatial variability of the hydraulic properties of a volcanic soil
G. Ciollaro and N. Romano 263
A soil survey procedure using the knowledge of soil pattern established on a previously mapped reference area
P. Lagacherie, J.P. Legros and P.A. Burrough 283
Distribution and genesis of calcitic pedofeatures within a rapidly aggrading loess–paleosol sequence in China
R.A. Kemp 303
Base saturation, nutrient cation, and organic matter increases during early pedogenesis on landslide scars in the Luquillo Experimental Forest, Puerto Rico
D.J. Zarin and A.H. Johnson 317
Implication of spatial variability of organic carbon on predicting pesticide mobility in soil
P. Lafrance and O. Banton 331

Book Reviews 339
